Tub Jug

"Taking visual cues from the appearance of a fuel container, we wanted to bring a new expression to the traditional table jug. Through its wide opening and handle, the Tub Jug is a simple and useful object to serve as a carafe, watering can or even a vase. Created in ceramics, the Tub Jug features a clear function when in use as well as an aesthetic presence when placed on the table, a sideboard or shelf."

Designed by Atelier BL119

About the Designer Atelier BL119 is a design studio, based in Saint-Étienne, France. Founded in 2007 by duo Grégory

Blain and Hervé Dixneuf, the studio works within industrial as well as spatial design.

Environment Indoor

Country of Production Portugal

Preassembled Yes.

Description The Tub Jug is an industrial carafe with a contemporary expression, echoed through its angled

handle and wide opening that bring both function and character to the design. The design is made

in glazed ceramics.

Material The Tub Jug is made from stoneware with glaze.

Liquid stoneware clay is poured into plaster molds in which the Tub Jug is molded. The design is then polished with a wet sponge and fired at 1000° Celsius. After firing, the Tub Jug is dipped in a water-based solution that contains the color mixture, following which it is placed in the kiln again,

this time at 1100° Celsius.

Clean with sponge and water. Dishwasher approved.
