

Cosima Series

Designed by kaschkasch

Cosima is a soft and embracing modular sofa, designed by the Cologne-based design duo, kaschkasch. The sofa is characterised by its extra seat depth and low arm and backrest, which gives Cosima an inviting appearance. On the inside, Cosima is made of sustainable wood and filled with real down that has been sewn in channels to extend the durability and shape. Cosima can be designed specifically to fulfil your dreams and needs, and you can remove or add modules whenever new needs arise.

About the Designers

kaschkasch, Germany

Our goal is to create simple and intuitive products – something that isn't over-complicated, yet is still beautiful. We always strive to design no-frill products that still possess a poetic element. We find our inspiration in almost anything. Building sites, fish markets, people, their way of behaving and so on. It isn't just about the surroundings, it's also about the interaction.

More info

Cosima is made a great soft comfortable sofa by using loose feathers, downs and fiber on top of a thick layer of cold foam. These loose filling are held in place by sewing the interlining in canals. This top filling is very soft and it can be moved around by sitting in the sofa and it can change shape over time. In order to maintain the sofa it is important that you fluff the sofa regularly but it is still not possible to keep the shape. Cosima will be more rounded in shape over time and the seams will follow this more organic shape, due to the soft comfortable filling. This is not seen as a defect but just normal wear and soft look of the sofa.
